

Sprint Review Checklist

Project Name	SARAPP	Project ID (if applicable)	SARAPP
Reviewer's Name	Angelika Galang, Troy Valdez, Rich Yap	Sprint No.	4
Review Date	03/23/18		

This checklist is to be used to assess if sprint goals have been achieved during the sprint. Particularly, if the target features of the software have been built based on user acceptance criteria.

Functional Goals:

User Acceptance Criteria	Compliance		Remarks	Estimated Value
	Yes	No		
UC-1.0-S1: User Searches for a Food Store	✓		User should now be able to search for a food store.	34
UC-1.0-S2: User Searches for a Food Store that does not exist in the database	✓		User should see an error message that the food store searched does not exist in the database.	34
TOTAL				68
Team Velocity (Add all values of UAC that have been complied)				178

Tester's Comments:

The search use case is well-implemented and displays with good user interface design. It is suggested though that the list of food stores available in the application's database be increased. Also, the developers could add a "No Results Found" message instead of just a blank list if the food store being searched is non-existent.

Usability Goals:

If interfaces will be delivered at the end of the sprint, evaluate the system according to Nielsen's Usability Heuristics. For items that are not applicable, check **NA**.

Nielsen's Usability Heuristics	Strongly Disagree					Strongly Agree	NA
	1	2	3	4	5		
Simple and Natural Dialogue					✓		
Speaks the Users' Language					✓		
Minimize User Memory Load					✓		
Consistency					✓		
Feedback					✓		
Clearly Marked Exits					✓		
Shortcuts							✓
Good Error Messages			✓				
Prevent Errors							✓
Help and Documentation							✓

Reviewer's Comments:

Almost the same with the tester's comment, the app could display a "No Results Found" message when a user searches for a food store that does not exist in the database. Nonetheless, the search use case is properly implemented and well-designed.
