Revision Control

History Revision:

Revision Date	Person Responsible	Version Number	Modification
11/28/18	Richelle Yap	1.0	Initial Document; Added program design to use case 2.0 (rate food store)

Control Class: RateFoodStoreController

Program Specification (Method): `Rate Food Store`

Input:

```
FoodStore – the id of the food store to be rated
User-added – the struct containing the rating of the user who
             rated the store (user_id, date_stamp, comment,
             quality, pricing, ambience, service)
```

Output:

```
None
```

Program Logic:

```
ADD User-added to
     User table database
ADD User-added and FoodStore tuple to
     FoodStoreRating table in database
```
