In partial fulfillment of academic requirements
for the course
CS 191 Software Engineering I
of the
1st Semester, AY <2017-2018>

Unique Reference:

The documents are stored in
https://github.com/jcvaldez1/CS191_G1_17-18_SARAPP/tree/master/02-Requirements%20Engineering

Document Purpose:

To Provide a use case specification for when the admin manages the food stores

Target Audience:

This document serves as a partial fulfillment of academic requirements for the CS 191 Software Engineering course, handled by Ma'am Rowena Solamo, to whom this document is made for. Additionally, the users of the application will mainly consist of students, teachers, staff, and guests who would visit and look for some place to eat inside University of the Philippines Diliman.

Revision Control

History Revision:

Revision Date	Person Responsible	Version Number	Modification
10/08/17	Julian Troy Valdez	1.0	Initial Document : Added the use case name, description, precondition, flow of scenario events, activity diagram and uploaded the document

Use-Case Name: 5.0 Edit Food Store
Description: This Use case functionality is available for the admins and allows them to edit an
                       existing food store's information

Preconditions: The pre-condition would be that the data available to the admin must be synced with
                       the web application. Also that the Admin would input all necessary data to be needed
                       to edit all the changes chosen to the specific food store.

Flow of Events:

Scenario Name	Description
Scenario 1 The Admin chooses to edit an existing food store	1. The Admin chooses to edit a specific existing food store 2. The Admin inputs all the necessary information to change the food store's information

Activity Diagram of the Flow of Events:

Admin

Admin chooses to edit a food store

Admin inputs all necessary information and successfully edits the chosen food store

Postcondition: That the server will sync all changes made by the Admin to all the food store metadatas

Relationships: NONE

Special Requirements: NONE
